De feedback:

Hey,

Really appreciate the democratic approach towards this approach and great designs for the streets. Some suggestions for the design of the street I live in -

1) Add street lamps in our street with yellow lights to give a warm feeling. Currently there is white light and lights hanging over which doesn't look pretty and is the only street with white coloured light which looks off.

Having yellow colour gives it a warm feeling and the lamps represent a typical Amsterdam street.

2) Install more trees, I see you are planning to plan 1 more big tree but I think the street can do with more.

Regards,

[REDACTED]

Met vriendelijke groet,
