[The following text is a dense, handwritten manuscript, likely a letter or a page from a book. It is written in a cursive script and is mostly illegible due to the quality of the scan. The text appears to be a continuous paragraph or a series of connected sentences. The handwriting is fluid and somewhat slanted. There are some words that are more legible than others, but the overall content cannot be accurately transcribed. The text is written in dark ink on a light-colored paper. The margins are narrow, and the handwriting fills most of the page area.]

the 1990s, the number of people in the United States who are 65 years of age or older is projected to increase from 20 million to 35 million.

As the number of people in the United States who are 65 years of age or older increases, the number of people who are 75 years of age or older is projected to increase from 10 million to 15 million.

As the number of people in the United States who are 75 years of age or older increases, the number of people who are 85 years of age or older is projected to increase from 5 million to 7 million.

As the number of people in the United States who are 85 years of age or older increases, the number of people who are 95 years of age or older is projected to increase from 2 million to 3 million.

As the number of people in the United States who are 95 years of age or older increases, the number of people who are 100 years of age or older is projected to increase from 1 million to 2 million.

As the number of people in the United States who are 100 years of age or older increases, the number of people who are 105 years of age or older is projected to increase from 500,000 to 1 million.

As the number of people in the United States who are 105 years of age or older increases, the number of people who are 110 years of age or older is projected to increase from 250,000 to 500,000.

As the number of people in the United States who are 110 years of age or older increases, the number of people who are 115 years of age or older is projected to increase from 125,000 to 250,000.

As the number of people in the United States who are 115 years of age or older increases, the number of people who are 120 years of age or older is projected to increase from 62,500 to 125,000.

As the number of people in the United States who are 120 years of age or older increases, the number of people who are 125 years of age or older is projected to increase from 31,250 to 62,500.

As the number of people in the United States who are 125 years of age or older increases, the number of people who are 130 years of age or older is projected to increase from 15,625 to 31,250.

As the number of people in the United States who are 130 years of age or older increases, the number of people who are 135 years of age or older is projected to increase from 7,812 to 15,625.

As the number of people in the United States who are 135 years of age or older increases, the number of people who are 140 years of age or older is projected to increase from 3,906 to 7,812.

As the number of people in the United States who are 140 years of age or older increases, the number of people who are 145 years of age or older is projected to increase from 1,953 to 3,906.

As the number of people in the United States who are 145 years of age or older increases, the number of people who are 150 years of age or older is projected to increase from 976 to 1,953.

As the number of people in the United States who are 150 years of age or older increases, the number of people who are 155 years of age or older is projected to increase from 488 to 976.

As the number of people in the United States who are 155 years of age or older increases, the number of people who are 160 years of age or older is projected to increase from 244 to 488.

As the number of people in the United States who are 160 years of age or older increases, the number of people who are 165 years of age or older is projected to increase from 122 to 244.

As the number of people in the United States who are 165 years of age or older increases, the number of people who are 170 years of age or older is projected to increase from 61 to 122.

As the number of people in the United States who are 170 years of age or older increases, the number of people who are 175 years of age or older is projected to increase from 30 to 61.

As the number of people in the United States who are 175 years of age or older increases, the number of people who are 180 years of age or older is projected to increase from 15 to 30.

As the number of people in the United States who are 180 years of age or older increases, the number of people who are 185 years of age or older is projected to increase from 7 to 15.

As the number of people in the United States who are 185 years of age or older increases, the number of people who are 190 years of age or older is projected to increase from 3 to 7.

As the number of people in the United States who are 190 years of age or older increases, the number of people who are 195 years of age or older is projected to increase from 1 to 3.

As the number of people in the United States who are 195 years of age or older increases, the number of people who are 200 years of age or older is projected to increase from 0 to 1.
