The diagram is a technical site plan for a water management project. On the left, a building with a hatched roof is shown. To its right is a large, irregularly shaped area labeled 'RINGSLOOT'. A dashed line representing a pipe or channel runs from the building towards the Ringsloot. Along this line, there are several labeled components: '2x MB Ø110 klekint' (two manholes with 110mm diameter), 'meting Ringsloot' (a measurement point for the Ringsloot), 'afsluiterput' (a closure pit), and 'overstortmeting' (an overflow measurement point). The drawing uses various line styles (solid, dashed, hatched) to represent different materials and structures.
