Hello [REDACTED],

Enclosed you find answers to questions of your experts. There are also answers concerning validity, reliability and weighing factors.

I'm coming next week with [REDACTED] (and with our technical expert [REDACTED]) to Haag, so we'll meet then.

Best regards,

MSc [REDACTED]

psychologist, [REDACTED] 10.2.g

Aihe: RE: testing of the Vita test

Dear [REDACTED],

Thanks for your answers.

I will sent this information to the experts. But before I do, I would like to ask you to answer the questions on validity, reliability and weighing factors in advance as well.

The experts have been given all the information you e-mailed us, also the document 'the Vita-test system'. So the questions of the experts came after reading the information you gave us.

It is important that the experts have answers on their questions before the meeting starts, because we only have an hour for questions and in the end of the day we want to come to a conclusion. And questions on validity, reliability and weighing factors are one of the most important issues.

Waiting for your answer,

[REDACTED]

Onderwerp: RE: testing of the Vita test

Dear [REDACTED]

Yes, the testing will be OK. We can use PC -test version, wich is installed in each laptop.

Please find attached answers to the questions you gave me on friday. (Answers have been wroten by psychologist [REDACTED]) Descriptions of the reliability, validity and weighting factors are presented in the document, whic was sent previously titled "The VITA-test-system. We can discuss these topics in den Haag in more details.

[REDACTED],

To be sure. So, then it is possible to test the Vita test, to see all the questions the applicants have to answer, the conclusion, etc.?

With regards,

[REDACTED]

Aihe: testing of the Vita test

Dear [REDACTED],

1. We do not have laptops for testing the Vita test and the experts want/need to test it on the 6th.

The only solution I see is that you bring 3 or 4 laptops with the pc version of the test installed on it. The laptops should be with filled batteries.

We do not have internet available for testing the internet version.

Could you please as soon as possible tell me if you can bring the pc version of the Vita test on 3 or 4 of your laptops so that the experts can test it?

2. Hereby you find the questions I received until now from the experts. Can you sent the answers the latest on Friday 31 of August as we agreed?

With regards,

[REDACTED]

I'll forward you the message from [REDACTED]

[REDACTED]  
professor, [REDACTED] 10.2.g.

Department of Behavioural Sciences

National Defence University  
[REDACTED]

Dear [REDACTED]

We coming to meet next week. I hope, that I can meet Your computer/software specialist. Below are some information and question about our software requirement.

#### VITA SOFTWARE

##### 1. PC - VERSION

###### 1.1. Requirement

VITA software minimum requirement:

- 1GB Ram memory
- 20M free space on hard disc
- Windows 7 - 32 bits operating system (Only 32Bits operating system are supported !)

###### 1.2. Data recording/saving

As the VITA software need to substantially save data, we need to know and to make sure that your country law allow the software to save personal data.

At the end of the questionnaire, the VITA software currently save, for a brief period, the following informations:

- License's number/id
- Applicant firstname
- Applicant lastname
- Applicant answers

From this list, we could remove the non-desired information(s) according to your country law and your needs.

Currently, the data is soon after deleted when the inquirer (cross-examiner) select to print and/or when he (re)start the VITA software to make sure that NO information are stored into the computer's memory.

This said, if you've requested to conduct further analysis with the applicants test result, the software would need to be allowed to save and store data, always according to your country law on personal privacy.

### 1.3. Protection / Security

Inorder to provide a total and secure protection to the VITA software, we strongly advise to remove each Machine where VITA is installed (aka "VITA Machine") from your NETWORK AND/OR INTERNET connection.

The "VITA Machine" would only be used to conduct the license's applicant test and possibly print / analyse.

By doing so, you would prevent any leaking possibilities of the questionnaires on the internet and therefore keep the questionnaire's result integrity safe.

Another important question concerning joining the "VITA Machine" into your network is: Will you allow the license's applicants to be (possibly navigate) on your network while conducting the test ?

## 2. NET - VERSION

### 2.1 Requirement

To increase performance and security, we strongly advise to install NETJOTOS on a DEDICATED server.

The server should have enhanced hardware features such as:

- Multi-core processors (intel XEON processor).
- Faster memory options for increased application performance (min 4GB).
- Multiple hard drives for increased data capacity and redundancy (SCSI RAID).
- Possibly, an externe hard disc for backup.

The server should also have:

- Windows Server 2003 R2 operating system (32bit only).
- Microsoft SQL Server 2000 database solution.
- Internet Information Server(IIS) 6.0

We would need to install:

- ActivePerl (ActiveX Scripting Engine)
- Htmldoc (Pdf-conversion)
- ActivePerl -programing modules

### 2.2 Installation / Localisation

We will assit you during the installation process but as an extra service, we could purchase and provide a dedicated fully ready server (extra cost) Further more, we could also provide you with a hosting solution for the server within our premises.

Subject: Vs: questions

weigeringsgrond 10.2.e, tenzij anders  
aangegeven

Dear [REDACTED]

You ask me questions that are a little bit beyond my expertise, but I'll answer as good as I can. .  
First question: In Finland an applicant for weapon permission will be interviewed and tested at a police station. The interview which is not structured, consists of question like - why do you need a weapon, where are you going to use it, what's the storing place like etc. Police has to check all possible hunting licences, memberships of a shooting/hunting club, possible criminal registers (no violent crimes) etc. If the VITA -result is OK, The police can make the decision, whether the applicant is allowed to carry a weapon or not.

If the test result is "Individual examination needed", the applicant has to get a medical doctor's or psychologist's certificate. This certificate is an expert's opinion, that is based on clinical tests, interviews or other methods. Based to these results and his/her professional experience he/she can only say that there are no contra indicators at the moment, or because of these test results, the weapon permission cannot be recommended. The police has the final decision. (In Finland the professional, giving the certificate, has not to be a psychiatrist, a general practitioner or a psychologist is enough)

Not any test is fool proof in predicting an individual persons behaviour. Statistically we can say that a test can add the quality of decision making. Test statistics are usually accurate. - I'm not sure if you got the mail and enclosure I sent you and miss [REDACTED] in summer about the VITA statistics. This copy is a part of the enclosure:

10.2.g.

10.2.g.

10.2.g.

10.2.g.

- Your last question was about the possibility to buy the test. It is possible that you can have rights to develop and improve the test independently. The basic research and development is combined to the netsystems engineering, so it's necessary that we can do it.

I'll forward you [redacted] mail where he is asking some questions of the systems assembly

best regards

Aihe: questions

Dear [redacted],

1. You told me today that in Finland when the applicant has filled in the Vita-test and the outcome is that it is not sure that a person can get a permission for a weapon, that person can ask a psychiatrist to write an expertise.

The psychiatrists in Finland give a concrete advice to the police if a permit for a weapon can be given or not. In the expertise they predict in the future the best they can about if the applicant should have a permit or not as I understood you correctly.

I would like to check if I understood this correctly. Could you confirm?

And you told me that the reliability of the psychiatrists is not an issue because people know that psychiatrists can do no more on the expertise they have.

The question I have is if a judge will not say that the psychiatrist is reliable when something goes wrong like people shot or suicide?

Or is it so that the psychiatrist says that he/she has no contra indication? That there are no indicators of something being wrong at that moment? What is the question of the police the psychiatrist is giving an answer on?

2. Another question is if it is possible to buy the Vita test, but to adjust it ourselves so that we can use it in Holland and make changes if necessary?

Could you answer these question today or Monday?

Could you also react if the program is fine by you?

3. I also include some questions I received today from [REDACTED]. Could you answer them as soon as possible, but no later then next week as we talked about, so she can read the answers in next weekend? Thanks a lot!

With regards and have a nice weekend,

[REDACTED]
