Dear colleagues,

We received an application for the export of 25 *Uromastix thomasi* to the United States. With the application we received a document of transaction. This document states that the 25 mastigures are offspring of specimens which were imported with Austrian import permit AT09-E0115.

Are you able to tell me, what the source code is of the specimens imported in the European Union. Can you also provide me with a copy of CITES document AT09-E0115.

Kind regards,

10.2.e

Aan: LSRZW Cites
CC: 10.2.e
Onderwerp: AW: Question about a transfer from Annex B specimens

Doorgestuurd naar 10.2.e

Dear colleague

BRW is not known to us as a breeder or holder. But we do not have a national system of compulsory registration for breeders and unless specimens are imported or exported, a breeder may remain unknown to us if he restricts his transactions to within the EU.

CITES AT 09-E 0070 (not 007) refers to an import permit for live *Uromastix thomasi* from Switzerland in 2009 by an Austrian breeder known to successfully breed *U. thomasi* in captivity (cleared by Austrian customs on 16 July 2009). CITES documents older than 3 years are archived and would require some time to extract. If you need a scan of the import permit, let me know and I will forward it as soon as possible.

Regards

Betreff: Question about a transfer from Annex B specimens

Dear colleagues,

We received an application for the export of 10 *Uromastix thomasi* with Austrian origin.

Are you able to tell me whether BRW is a well known breeder with the species *Uromastix thomasi* and whether the breeding of the specimens meet the requirements for specimens born and bred in captivity (source code C) according to the Art. 54 of the Commission Regulation (EC) No. 865/2006. Also on the transfer documents there is mentioning of an Abstammung no.: CITES AT 09-E 007. Are you also able to tell me what this number means, is it a CITES document number and is so, are you able to sent me a scan of this CITES document.

Please find attached the transfer documents of the mentioned breeder to 10.2.e in the Netherlands, I also attached a scan of the transfer document, with which the breeder 10.2.e received the parent animals.

With kind regards,

10.2.e

Dear 10.2.e ,

thank you for your mail. Firstly, I would just like to correct the permit number of the parents mentioned in the CITES B Statement and another document you sent headed F/F SNAKES. The correct permit number is AT09-E 0070.

The specimens you refer to were originally brought into Austria from Switzerland, but with a country of origin where the species does not occur. That Austrian parental stock we have therefore treated as illegal but we had no legal options other than to inform the Austrian breeder that he cannot export them and that offspring had to be associated with source code "F". The logical consequence is that we cannot confirm source code "C".

Kind regards

10.2.e

Betreff: Uromastyx Thomasi breeding

Dear colleagues,

We received an application for export of 4 *Uromastyx Thomasi* (see attachment for breeder statement). Could you verify that these animals are bred in captivity and have source code 'C'?

I first contacted the Management Authority in Italy (see the attachment). But they couldn't verify the source code because the number of the import permit (AT09(or AT-0J?)-EC070) is not in a format used by the Italian authorities. The applicant told me the import permit is from Austria. Hopefully you can verify the source code.

Kind regards,

10.2.e

Dear Mr 10.2.e ,

I come back to you concerning your enquiry about the breeder BRW

The Vienna City animal welfare unit has informed me that BRW is registered as breeder of *Uromastyx thomasi* and his facility is meeting all animal welfare requirements.

I also asked for proof of legal acquisition and BRW could proof this, too. Also the parents of the specimens in questions were captive bred. BRW sent pictures of the spacious terrarium.

I hope this information is useful for you.

Please
d

on't hesitate to get back to me for further questions.

Kind regards,

Dear colleagues,

We received an application for the export of 1 specimen of the species: *Uromastyx thomasi* from Austria, which has been bred by:

BRW

Are you able to tell us if BRW is known as a breeder for this species and whether the breeding of the specimens meet the requirements for specimens born and bred in captivity (source code C) according to the Art. 54 of the Commission Regulation (EC) No. 865/2006?

Please find a copy of the certificate or origin in the attachment (page 2/3).

Kind regards,

10.2.e
 Permit officer

Dear 10.2.e

Attached is the requested document.

BRW brought into Austria Uromastyx thomasi from Switzerland, in two batches. In one with origin Mali, which is not a range state, and another with origin Switzerland. If you ask me, they all have a very questionable origin. Unfortunately, the one declared origin Mali slipped through our system but we then picked up on it and contacted Switzerland with the request to declare the original import from Mali as null and void, because that would be the only basis for us to be able to initiate legal proceedings. Unfortunately, the Swiss Authorities not prepared to do this. So I cannot be sure of the real origin of the animals in your country. We know BRW as a breeder of tortoises, but not of U. tomasi. Mr. BRW has developed a very mixed reputation with us and needs careful observation.

I hope this helps, but it may be worthwhile to also contact the Swiss colleagues.

Kind regards, and apologies for the delay in response

 10.2.e
Betreff: RE: Breeder information Uromastyx thomasi 4890021708857

Dear 10.2.e,

The second page of the attachment is the certificate of origin of the parental animals. The 8 specimens bred by BRW are born in 2018. The parental animals are born in 2010 as you can see in the attachment.

My apologies for the ambiguity but are you able to tell us if 10.2.e is known as a breeder for this species and whether the breeding of the specimens meet the requirements for specimens born and bred in captivity (source code C) according to the Art. 54 of the Commission Regulation (EC) No. 865/2006?

Furthermore the second page of the attachment states a CITES number. To me it seems a permit number relating to the grand-parental animals. Are you able to confirm this and send us a copy of the permit?

Thanks in advance!

Kind regards,

10.2.e

Dear colleagues,

The local authority in charge of captive wild animals controles confirms that BRW as a registered breeder. Her breeding activities involves animals born in captivity exclusively.

Sincerely,

10.2.e

Onderwerp: Re: verification of animal breeder.

Dear colleagues,

I just had confirmation from our local authority that this animal breeder is in order.
 Pages 2 to 4 of the attached document are extracts from his inventory, so it has nothing to do with CITES documentation (we use this extract to make sure he follows the rule).

Best regards,

10.2.e

Dear Colleagues,

Could you please verify for us the following animal breeder?

BRW

In the attached document you can see that he sold Uromastyx Thomassi to a trader in the Netherlands.

In addition, I have a question about the second page of the attached document. I have never seen this kind of form before.

I was wondering whether this is already a declaration from CITES that this breeder is approved?

I hope to hear from you soon.

Thank you in advance.

Kind regards,

Dear colleague,

BRW is actually breeding this species. He acquired the parental stock legally in Spain and Poland in December 2015 and March 2014 respectively.
 He has demonstrated that he is able to produce a F2 generation offspring.

Best regards,

10.2.e

Bijlagen: information specimen Uromastyx thomasi 4890021818943.pdf
Urgentie: Hoog

Dear colleagues,

We received an application for the export of 2 specimens of the species: *Uromastyx thomasi*, which turns out, have been bred by:

BRW

The specimen are hatchet in 2014/2015 and after that probably transferred to Germany.

Are you able to tell us if BRW is known as a breeder for these species and whether the breeding of the specimens meet the requirements for specimens born and bred in captivity (source code C) according to the Art. 54 of the Commission Regulation (EC) No. 865/2006?

I attached the transfer document from Germany to the Netherlands.

Sorry for the urgency, it turns out to be an important matter now.

Thank you in advance for your cooperation.

Kind regards,

Dear Colleagues,

We are able to tell you that BRW is a breeder for reptiles (except venomous or dangerous ones).

As you can see in the attached documents, we only know of one specimen of *Uromastyx thomasi* which was born in 2015, transferred to BRW in 2017 from a BRW and then sold to BRW in 2018.

We hope these information will help.

Best regards from us.

Dear 10.2.e
 according to the checks carried out by our local enforcement office, the person named as "cedente" (transferor) in the document "dichiarazione di cessione a fini CITES" (transfer declaration) that you have sent us is not a verified breeder of *Uromastyx Thomasi* in accordance with art. 54 Reg.(CE) n. 865/2006.

Moreover, the number AT09(or AT-0J?)-EC070 indicated in the same document as "protocollo di nascita" is not in a format used by the Italian authorities and there is no reference to the office where the born communication is supposed to has been made.

Have you any other document or information that could help us to verify the origin of these specimen?

Best regards,

Dear 10.2.e,

Thank you for your e-mail. I have a question about the e-mail in the attachment. Was this e-mail only about the BRW ? Or did the colleagues from the Enforcement authority also verified that the *Urosmastyx Thomasi* have been born in captivity in accordance with art. 54 Reg.(CE) n. 865/2006? I was still waiting for your respons on my e-mail below for the *Uromastyx Thomasi*. But maybe the e-mail in the attachment was for both species?

Hope to hear from you soon.

Dear colleagues,
 about your request, our local CITES office has completed the check on the breeder, therefore we refer to that:

1. BRW is known as breeder of *Uromastyx thomasi*.
2. The transfer declaration of n. 2 live specimens *Uromastyx thomasi* from BRW to Mr. BRW is authentic.
3. Nr. 2 live specimens transferred to Mr. BRW were born from specimens with source -C- (captive).

Best regards

Oggetto: Breeder information Uromastix thomasi 4890021712020

Dear colleagues,

We received an application for the export of 2 specimens of the species: *Uromastix thomasi* from Italy, which have been bred by:

BRW

Are you able to tell us if BRW is known as a breeder for this species and whether the breeding of the specimens meet the requirements for specimens born and bred in captivity (source code C) according to the Art. 54 of the Commission Regulation (EC) No. 865/2006?

Please find a copy of the certificate or origin in the attachment.

Kind regards,

10.2.e

Onderwerp: Breeder information Uromastyx thomasi 4890021818943

Dear colleagues,

We received an application for the export of 2 specimens of the species: *Uromastyx thomasi*.

The breeder is BRW but we don't have his address. Maybe BRW is connected to the company BRW? I searched the internet, but it looks like a French company.
 Please find a copy of the document with information about the animals in the attachment.

Are you able to track down the breeder and tell us if the breeder is known as a breeder for these species and whether the breeding of the specimens meet the requirements for specimens born and bred in captivity (source code C) according to the Art. 54 of the Commission Regulation (EC) No. 865/2006?

In the attachment there's an e-mail of 10.2.e of the Regierungsprasidium Darmstadt. He confirms that the animals are duly reported. That doesn't automatically mean that the animals are born and bred in captivity though?

Kind regards,

Eénmalig positief advies over de invoer (nr 4890021179770) van 3 levende exemplaren van de soort *Uromastix thomasi* (oorsprong C) afkomstig van kweker/fokker BRW uit Kiev, Oekraïne (doel T), bestemd voor BRW uit Amsterdam.

Geachte mevrouw 10.2.e

In antwoord op uw adviesvraag (nr 4890021179770) van 9 mei 2019 bericht ik u dat de Wetenschappelijke Autoriteit CITES Nederland (WA), na onderzoek van de beschikbare gegevens, als volgt adviseert over deze aanvraag, in overeenstemming met artikel 4.2.a van de Europese Verordening 338/97 en artikel 54 van de Europese Verordening 865/2006.

De WA acht de opgegeven oorsprong C, afkomstig van BRW uit Oekraïne aannemelijk en invoer van 3 levende exemplaren van de soort *Uromastix thomasi* uit Oekraïne niet nadelig voor instandhouding van de wilde populaties.

Dit advies is alleen geldig voor de bovengenoemde kweker. Het betreft een éénmalig advies. In geval u of derden dit advies onvoldoende inzichtelijk achten, is de WA gaarne bereid toelichting te geven, dan wel specifieke vragen schriftelijk te beantwoorden.

Den Haag, 4 december 2017

Positief advies over kweek (nr. 4890020388309) van 9 levende exemplaren van *Uromastyx thomasi* (oorsprong C), afkomstig van kweker BRW, Nederland, doel T.

Geachte heer 10.2.e ,

In antwoord op uw adviesvraag CITES nr. 4890020388309 van 16 november 2017, bericht ik u dat de Wetenschappelijke Autoriteit CITES Nederland (WA), na onderzoek van de beschikbare gegevens, positief adviseert over deze aanvraag, in overeenstemming met artikel 5.4 (5.2.a) van Europese Verordening 338/97 en artikel 54 van de Europese Verordening 865/2006.

De WA acht de kweekstatus aannemelijk en oordeelt dat de uitvoer van 9 levende exemplaren van de soort *Uromastyx thomasi*, afkomstig uit Nederland (Appendix II/Bijlage B, oorsprong C) van kweker BRW niet nadelig voor de instandhouding van de in het wild levende populatie van deze soort.

Advies is alleen geldig voor genoemde kweker.

In geval u of derden dit advies onvoldoende inzichtelijk achten, is de WA gaarne bereid toelichting te geven, dan wel specifieke vragen schriftelijk te beantwoorden.

Met vriendelijke groet,

BRW
